

DISCUS

An event for all ages where athletes throw a discus in an attempt to throw the furthest within the rules.

Competition

- Trials in Field Events
 - Depending on the event type or club rules, athletes may either have three trials or have three trials each with the top eight competitors progressing to the final round where another three trials will be held.
 - The order of competition is usually in name order as listed on the results recording sheet for the first three throws. The following three attempts are resorted with the shortest distance going first to the longest distance going last.
 - Athletes are not allowed to take their attempts consecutively
- During Competition
 - Practice attempts are allowed before the competition begins but not once it has started.
 - The athlete may enter the circle to start his attempt from any direction
 - The athlete must start their attempt from a stationary position inside the circle (meaning they can't do a run up from the outside of the circle)
 - There are no specific methods or styles for throwing the Discus for competition purposes
 - During the throw, an athlete may touch the inside of the rim of the circle without penalty. However if any part of the athlete's body touches the top or outside of the circle it is a no throw (shoe laces don't count)
 - The athlete shall not leave the circle until the implement has landed
 - When leaving the circle, the first contact with the top of the circle or outside the circle must be behind the white lines drawn on the outside of the circle.

DISCUS

- A competitor fails and a foul is recorded if:
 - He infringes any of the above rules
 - If the discus lands on or outside the sector lines
 - After stepping into the circle and standing to throw, the competitor touches with any part of his body the tip of the circle or rim or the ground outside

- Measuring and Recording a Throw
 - Measure all valid (fair) attempts regardless of whether they were better or worse than the previous
 - Also place the spike where the discus lands until the official gives the all clear (Fouls are not measured unless there is a protest)
 - If the discus hits the cage, but lands in the sector line, it is not a foul
 - Measure from the nearest mark/location to the circle made by the discus. The zero measurement goes at the end where the discus lands
 - Draw the tape taut across the stop board and pull it through the centre of the circle
 - The distance is measured at the point where the tape crosses the inner edge of the circle. If the measurement is not a whole centimetre, take the nearest centimetre below the measurement
 - Record the distance in the space provided. Fouls = X Pass = -
 - At the end of the competition record each athlete's best performance and his final place. The person that comes first is the athlete with the longest distance.
 - Where there is a tie for any place, count back to the second best performance of the tied athletes and if the tie still remains count back to the third best and so on.

Safety

- Never throw the discus back when retrieving
- Officials/volunteers/athletes stand in an area safe, away from the throw of the discus
- Retrievers also have eyes on the circle

Coaching Tips

- Coaching should only be done at club days or training days – not competitions
- Start low and finish high
- Tall delivery when throwing
- Look toward the direction of the throw
- Extend arm fully through the throw and finish with a long arm
